

Plastic Enclosures

Shallow Water Applications

Light Weight

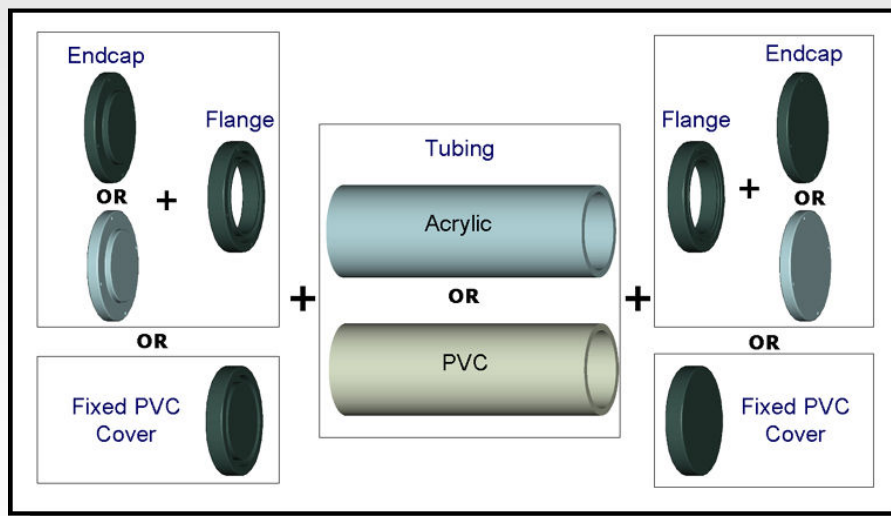

Corrosion Resistant

Cost Effective

We are ready to design custom enclosure to your requirements from acetal, PVC, acrylic or other suitable plastics. We have also developed a line of plastic enclosures ready for your prototyping needs. Our EasyPods can be configured to your requirements while allowing for a fast turnaround time.

EasyPods standard diameters are based on acrylic tubing size or PVC pipe sizes, from 4 Inch to 8 Inch in diameter. Enclosure lengths are customer specified.

You can select the tubes to be transparent (acrylic or PVC) or standard white PVC color. End-caps can be made out of acrylic as well but we do recommend using PVC end-caps when fitting with U/W connectors.
